#### **Continous Power**

Continuous working power under constant load. The average load value can be 100%. It cannot be overloaded.

#### Standby Power

Working power in limited time under variable load. With an average load of 70%, it can operate for a total of 200 hours a year. It is used as backup power in mains power outages. Cannot be overloaded.

#### Prime Power

Continuous working power under variable load. Average load value should be 70%. Every 12 hours 10% can be overloaded.

#### 50 Hz, 230/400V

#### **STANDARD FEATURES**

Water cooled diesel engine	Steel chassis and anti-vibration wedges
Radiator and mechanical fan	Electronic battery charger
Protective cage that prevents touching rotating and hot parts	Operating and installation manual
Electric starter and charge alternator	Alternator with single bearing and H insulation class
Battery, cables and stand	Industrial capacity muffler and flexible steel compensator
Flexible fuel connection hoses	Engine water heater

**Engine controller** 

The D-300 is a cost effective, modern technology genset controller ready for internet monitoring. Its main advantages are multifunctionality, support for multiple topologies, harmonic analysis and detailed power measurements.

Software features are complete with easy firmware upgrade through USB port. The Windows based PC software allows monitoring and programming through USB, RS-232 and GPRS.

The Rainbow Scada web service allows monitoring and control of an unlimited number of gensets from a single central location.
